OBJECTIVE

Fresh graduate software engineer with a strong background in full-stack development and hands-on experience delivering real-world applications. Experienced in JavaScript, TypeScript, Python, and C#, with a focus on building scalable systems, clean APIs, and user-focused products. Comfortable owning features end-to-end, collaborating across teams, and learning new technologies quickly. Highly interested in developer tools, automation, and AI-assisted software development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#

Frontend: React, Next.js, Angular, HTML5, CSS3, Tailwind, Bootstrap, Redux

Backend and APIs: Node.js, ASP.NET Core, Web APIs, RESTful Services, LINQ, Entity Framework

Databases: SQL Server, MySQL, Query Optimization

Mobile: Flutter, React Native

Tools and Systems: Git, GitHub, Postman, Swagger, CI workflows, VS Code, Jira, Notion

Foundations: Data Structures and Algorithms, OOP, Software Architecture Basics, Secure Coding, Agile and Scrum, Software Testing Fundamentals, OS and Network Fundamentals

EDUCATION

Full Stack Development Program - Information Technology Institute (ITI)

Jul 2025 – Oct 2025

Track: Full-stack Development using .NET & Angular

B.Sc. in Computer Science - Nile University

Sep 2020 – Jul 2024

GPA: 3.2 (Very Good)

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

Jul 2020 – Present

Remote

- Built and shipped 25+ production-ready web applications, owning requirements, architecture, development, and deployment.
- Developed responsive, user-focused interfaces and scalable backend APIs using modern JavaScript and TypeScript frameworks.
- Iterated rapidly based on user feedback, improving usability, performance, and reliability across multiple projects.
- Worked autonomously while communicating technical decisions clearly to non-technical clients.

Software Engineering Intern

Oct 2025 – Nov 2025

Gameball, Giza, Egypt

- Contributed to backend services and API integrations within a production codebase.
- Collaborated with engineers to understand system design, data flows, and real-world scalability constraints.

Full Stack Intern

Jul 2025 – Sep 2025

Azm Squad, Remote

- Built full stack applications using React, ASP.NET Core, and SQL Server, focusing on clean APIs and maintainable architecture.
- Designed and implemented RESTful services and integrated them with modern frontend components.

- Practiced version control, Agile workflows, and self-directed feature development.

Junior Teaching Assistant

Mar 2024 – May 2024

Nile University , Giza, Egypt

- Supported 50+ students in Data Structures and Software Engineering, explaining complex concepts clearly and effectively.

Software Developer Intern

Jul 2023 – Mar 2024

Key2Soft , Cairo, Egypt

- Built backend modules using ASP.NET Boilerplate and MSSQL within an enterprise system.
- Implemented authentication flows and unit tests to improve system stability and security.

PROJECTS

Arabni MaaS Platform - [Project Showcase](#) | [Certificate Link](#)

Role: Team Leader

Type: Graduation Project (Web & Mobile Application)

Technologies Used: Flutter, Firebase, Python, Jupyter, Figma, GitHub, Slack, Jira

Led a team of 5 to design and develop this graduation project, a comprehensive Mobility-as-a-Service platform connecting users with service providers. Implemented responsive UI, secure authentication, and real-time service management. Recognized as the **2nd Best Graduation Project** in the Computer Science major. Pitched the project in multiple competitions, achieving **Top 10 out of 500+ startups** in the NilePreneurs incubation program.

EGYCan Factory Website - [View Live](#)

Role: Full-stack Developer

Type: Web Application

Technologies Used: React, TypeScript, Tailwind CSS, shadcn-ui

Built a business platform to provide innovative solutions for enterprises. Key features include a modern responsive interface, product catalog and browsing, service management, and customer engagement tools. Optimized for seamless navigation and enterprise usability.

Qurennet Healthcare Platform - [View Live](#)

Role: Backend Developer

Type: Web Application

Technologies Used: ASP.NET, C#, MS SQL Server, Web API

Developed a secure digital healthcare platform connecting patients and providers. Key features include patient-provider appointment system, secure telemedicine integration, real-time service management, and healthcare data encryption to ensure privacy and compliance.

KEY ACHIEVEMENTS

Toastmasters International Club

Joined Toastmasters in 2024 to strengthen public speaking and leadership skills. Active speaker in regular sessions and table topics. Awarded *Best Speaker* for outstanding prepared speeches. [Club Website](#) | [Certificate](#)

Nutshell Scientific Magazine, Nile University

Special Member at Nile University's first scientific magazine. Served on the Media Committee as a graphic designer, producing social media and print materials for events. Recognized with a *Special Member Award*. [Club Page](#) | [Certificate Link](#)

Enactus Nile University

Active member of Enactus, contributing to a sustainability project focused on reusing banana tree stems. Worked within the Project Management Committee through research, planning, and regular collaboration. [Club Page](#)

Egyptian Collegiate Programming Contest (ECPC)

Participated in ECPC, a highly competitive 7-hour continuous programming contest. Gained hands-on experience in problem-solving, algorithms, teamwork under pressure, and competitive programming. [Certificate](#)
